
{Taito Type X X2 Emulator With 18 Games And Frontend}

I tried pressing ctrl alt f9, but nothing. I confirm that everything is fine on ttx3. I have 2 decrypted ttx3 running Usf4 :) And one for multi games. Don't want to post it as it's just mine and I'm the only one who needs it... Yes. With that ttx3 I tried it in multi games, that's why I wrote... But with the ttx3 I made for ttx and playing multi games, it's fine. Yes, exactly in multi game mode. And the ttx3 I made for ttx and playing in ttx-e mode is fine. Yes. Thank you.
