From the Nintendo DS™, a device loaded with features never before seen in a handheld game system! Includes the following games: • Castlevania: Circle of the Moon • Castlevania: Harmony of Dissonance • Castlevania: Aria of Sorrow • Castlevania: Dracula X A reminder that every page, every time, is only as good as its last page, so please bookmark us at itch.io. SUPPORT HIGHLY. We're always open to feedback and appreciate any kind of support! You're what drives us. Check out this trailer to see what's in store for this ultimate collection! Credits: Theme song: "Circles" by Kevin MacLeod (incompetech.com) Licensed under Creative Commons: By Attribution 3.0 License Dracula Untold is the prequel to 2012's Dracula, and it follows the exact same timeline as the original game. If you want to know what the plot is like, you can watch the trailer below. The game is also noteworthy because it will have different endings depending on the choices you make, which is quite different from the other versions of the game where there is usually only one ending. This is the version you can get for PlayStation 4 and Xbox One right now, but since it is still in early access, there won't be anything like this on PC for a while. Gameplay: Instead of being a traditional overhead action game, this is a beat'em up type where players use the touchscreen to build combos and attack enemies. The game will have easy, medium, and hard modes, where in normal mode there is no story, and in hard mode, there is a story to follow. The real game features seven main characters – Belmont, Harku, Mieli, Babi, Dracula, Franz, and Bento. c9d1549cdd
